Subject: Microsoft Settlement

Dear Sir or Madam;

I urge the Justice Department to end its litigation of Microsoft and do what ever it can to end litigation by States.

I am a long time computer user beginning with the Apple Mac at its first introduction. Microsoft has done nothing to hurt me as a user of its products - quite the contrary, it has provided extraordinary opportunity. As an independent developer and web designer I can only applaud Microsoft's efforts in the computer field and look forward to future development when the company is allowed to do so.

Thank you for your attention.
